PROFILE

I am AI Product Builder with 9 years across fullstack development, ML and AI systems. I love solving difficult problems together, proactively taking leadership and practicing yoga. Working in a team is an art that I enjoy refining. I am looking for stimulating team where I can co-author ideas into existence.

EXPERIENCE

AI Engineer

Dennemeyer

Jul 2025 - Present

Lisbon, Portugal (Hybrid)

- Leading AI stream of DIAMS Infinity, owning the technical lifecycle across R&D, production and product discovery for global IPMS
- Shipped the platform's first AI features, including copilot and semantic search, from zero to beta launch for enterprise customers.

Technical Co-founder

Customer Support Singularity

Nov 2024 - Jun 2025

Remote

- Led technical product discovery, shipped multi-agent voice outreach platform that executed 300k+ calls. Platform
- Solved high-concurrency engineering bottlenecks across the stack, including failure recovery, lead attribution tracking, and unique measurable CTA links via ShortIO. Managed peak loads of 10k calls on Sunday evenings

Machine Learning Engineer

Reface, backed by a16z

Nov 2021 - Aug 2024

Kyiv, Ukraine

- Engineered deep learning training pipelines for 3D head avatars, taking a raw selfie video from a smartphone to a fully animatable, true-to-scale VR reconstruction in under 5 minutes.
- Deployed implicit neural textures onto mobile GPUs (Meta Quest 2) by writing custom shaders that decoded learned feature maps in UV space, getting to real-time rendering.

Data Scientist

AlterSoft

Oct 2020 - Nov 2021

Lviv, Ukraine

- Created intelligence layer for brand-awareness: finetuned and deployed BERT-family models for sentiment analysis, topic classification, and trend detection on live news streams

ML Engineer / Software Engineer

Sigma Software

Jun 2018 - Oct 2020

Kharkiv, Ukraine

- Developed chatbot (rule-based + embeddings + semantic search) for thousands of employees
- Shipped mobile warehousing app used by 40k+ workers
- Engineered microservices for managing heating devices

Haskell Developer Intern

Serokell

Feb 2018 - May 2018

Kharkiv, Ukraine

- Implemented bech32 decoding for bitcoin wallets that enables putting address into QR code

Software Engineer

Compent

Jun 2017 - Feb 2018

Kharkiv, Ukraine

- Developing CMS for Danish sport teams
- Made my first OOS contribution - to Umbraco CMS!

EDUCATION

Master's degree, Data Science , Ukrainian Catholic University	2020 - 2023
Bachelor of Software Engineering , Kharkiv National University of Radio Electronics	2016 - 2020

Publication

- *Split Activation Networks for Neural Fields*. UCU Repository. <https://hdl.handle.net/20.500.14570/3943>
- *Implicit Meta-Learning in Small Transformer Models* BlackboxNLP <https://openreview.net/forum?id=rvGeznBEjw>

Skills

- *Python, TypeScript, LLMs, LangGraph, MCP, PyTorch, Next.js, React Native, SQL, Docker, Linux, Azure, GLSL*
